2013 INTERNATIONAL YEAR OF STATISTICS Statistics in Applications Forum

Date: October 1, 2013

Time: 3pm—5:30pm

Location: B-115 Wells Hall

Keynote Speaker: Dr. Trivellore Raghunathan,
Chair of Biostatistics, University of Michigan

The Statistics in Applications Forum will showcase applications in high throughput data technologies, health sciences research biological sciences where statistical methods play an important role. The purpose is to promote awareness of the breadth of statistical applications and promote interactions between researchers from different fields. Undergraduate and graduate students are particularly invited to participate. There will be awards for best student posters and raffle prizes.

If you would like to present, we have a poster template. Please send an email to one of the organizers listed on the left, and we will be delighted to get in touch with you.

The International Year of Statistics 2013 is an initiative of several associations and supported by hundreds of organizations worldwide. For more information please visit: <http://www.statistics2013.org>
